PROFESSIONAL SUMMARY

Computer Engineering student and full-stack / Generative AI developer with hands-on experience building production-grade AI applications for healthcare, education, and logistics. Skilled in Python, FastAPI, React, and Node.js, with strong focus on Generative AI Engineering: Retrieval-Augmented Generation (RAG), LangChain, Large Language Model (LLM) APIs, Prompt Engineering, Vector Search, Machine Learning, PyTorch, and Agentic AI. Experienced in building and deploying full-stack applications, REST APIs, and automation tools with a track record of delivering functional, scalable software solutions.

Core Competencies: Software Development, Full-Stack Development, API Development, Machine Learning, Problem Solving, Team Collaboration, Agile Development, Version Control, Debugging, Technical Documentation

TECHNICAL SKILLS

Programming Languages: C, C++, Python, JavaScript, HTML, CSS, SQL

Generative AI / Machine Learning: LangChain, Retrieval-Augmented Generation (RAG), LLM APIs, Prompt Engineering, Machine Learning, Natural Language Processing (NLP), PyTorch, Hugging Face, Pinecone DB, Vector Search, Agentic AI, Gemini API, Groq API

Full-Stack Development: React, Next.js, Node.js, Express, Tailwind CSS, FastAPI, REST APIs, MongoDB, PostgreSQL, Firebase

Tools & Platforms: Git, GitHub, GitHub Actions, Vercel, Streamlit, VS Code, Docker, CI/CD, OAuth, Webhooks

EDUCATION

Fr. Conceicao Rodrigues College of Engineering

Bachelor of Engineering, Computer Engineering – CGPA: 8.4/10

Mumbai, India

2023 – 2027

PROJECTS

Vidya – AI Academic Ecosystem | *Python, LangChain, Pinecone DB, FastAPI, React, Firebase*

[GitHub](#)

- Built a Retrieval-Augmented Generation (RAG) powered CBSE tutoring platform with automated failover between Gemini and Groq LLM APIs, achieving 100% uptime across 50,000+ indexed educational documents.
- Engineered the COMPASS Framework, an adaptive mastery-sequencing engine using Knowledge Graphs for automated grading and personalized learning paths.
- Integrated PaddleOCR for handwriting recognition and Firebase Role-Based Access Control (RBAC) for secure multi-role dashboards supporting student and parent users.

GitHub Automation Bot | *Next.js, Auth.js, Prisma, PostgreSQL, Octokit, Slack API*

[Live Demo](#)

- Developed a production-grade GitHub automation platform with GitHub OAuth authentication and a repository-connect flow that provisions webhooks per repository.
- Implemented secure webhook ingestion using delivery ID idempotency checks and signature verification to prevent duplicate or malicious events.
- Designed rule-driven automation for labels, comments, and Slack notifications, including a retry sweep for failed actions and dashboards for connected repositories and action history.

Codebase X-Ray – AST-Driven Architecture Analysis Platform | *React, Node.js, Express*

[Live Demo](#)

- Built a fully private, Abstract Syntax Tree (AST) based static analysis platform that parses local repositories or GitHub URLs to auto-generate evidence-based system design diagrams, layer mappings, and blast-radius impact analysis.
- Engineered an interactive refactoring simulator that predicts broken imports and ripple effects in real time, plus a one-click auto-fixer for missing environment variable references.
- Shipped one-click Mermaid.js architecture documentation export and a GitHub Actions pull request guard workflow that blocks pull requests introducing circular dependencies.

CERTIFICATIONS & ACHIEVEMENTS

Finalist, Bit N Build Hackathon (2025)

Google Cloud Career Launchpad – Cloud Engineer Track, Google Cloud (Mar 2026)

AWS Academy Graduate – Cloud Architecting, AWS Academy (Apr 2026)

SQL (Basic and Intermediate), HackerRank (2025)

Introduction to Java Spring Framework, Simplilearn (2025)
